The Training Standard of Excellence

POSITIVES

- CAC discrepancies have greatly improved. Airmen are no longer missing or possess non-working CACs.
- Airmen have heightened COVID safety awareness. They are well disciplined with mask wear and social distance requirements.

CHALLENGES

- Airmen continuously experience pay discrepancies and LES access.
- Quarantine BMT flights trigger accelerated in-processing and missed class start dates.

Other Comments

- Streamline official BMT PT test entry into myFSS.
- Tweak military bearing inconsistency amongst BMT flights/squadron.
- Improve BMT ship list communication between BMT and tech training locations.
- Shift BMT arrivals to earlier time (NLT 0600) to allow efficient in-processing and smoother transition.
