Crane & Stout Japanese Patent
No. 144569 - dated July 16, 1941

Dear Major Crane:

The above Japanese patent has now issued and the annuities due in 1941-42 and 43 have been paid. In accordance with the practice of the Japanese Patent Office the power of attorney which was filed when the application was filed does not authorize our agent to represent the patentee after the grant of the patent. Foreign patentees are supposed to have a representative in Japan at all times and we are accordingly enclosing a power of attorney in favor of Hideo Kai and request that you sign at the place indicated below, having your signature witnessed and then notarized.

Thereafter, if you will return this power of attorney to me we will send it out to Mr. Stout and secure his signature so that the power of attorney can be filed in Japan. The original document (patent) has not yet been received.

Very truly yours,

FBS:G
