FOREIGN BUSINESS OFFICES. Richard W. Cooke, Inc., Eastern office 154 Nassau Street, New York City; Western oftice, A. R. Keator, 1411 Hartford Bldg., Chicago, III.

Entered as second-class matter June 11, 1918, at the post office at San Antonio, Texas, under the act of March 3, 1879.

The Kelly Field Eagle is the outcome of a firm conviction on the part of those who are responsible for it, that the sol-diers to whom it goes should be kept in-formed of the news events which are vital to their welfare.

Its chief purposes are widespread and various. The Eagle wishes to reflect sol-dier opinion as much as possible and at the same time bolster the spirit and morale of the air service. It is upon this branch of the service that the eyes of America are turned, and the Eagle will do its part to see that America is not disappointed.

It will disseminate all the important and essential news and at the same time act as a check upon "wild" rumors which are conceived in ignorance and spread nothing but hysteria.

Setting a Record in **Army Newspapers**

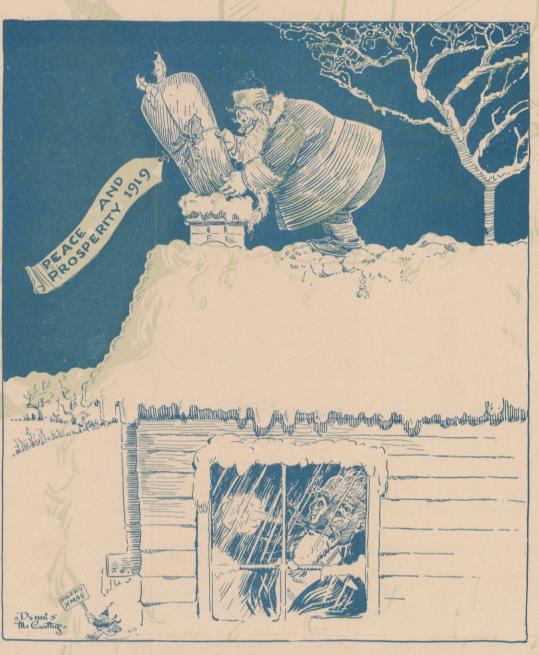

YOU are presented today with the biggest Army Camp newspaper the World has ever seen, 52 pages in all with material in it that cannot be touched by any other publication. The Kelly Field Eagle has set a record here and a record that the Aviation Field can well be proud of. With a staff sadly limited by the influenza epidemic, with death even having taken one of our mainstays, the men who have contributed to this number have worked tirelessly night and day.

The splendid advertising representation within these pages is the work, almost exclusively of one man, Private William E. Jones, an expert advertising man who, in the face of serious consideration, asserted that he could put the number over... And he did. We are sorry that we have no picture of Jones to reproduce with the other members of the staff, but he was chosen to accompany the body of Sergeant First Class George H. Righter to Philadelphia and he left before it was possible for him to visit the photographer. We therefore wish, in our humble way, to thank Private Jones for his excellent work, and to say that without his effort this number could not have been possible.

To every person who gets a copy of this Christmas Number we urge that he keep it as a memento of Kelly Field and his work and life here. In after years it will be a record of the greatest value.

And to everyone the staff of the Kelly Field Eagle takes this opportunity to wish the Merriest of Christmases and the Happiest of New Years.

There's Many a Sock Twixt The Chimney and the Boot

The Yankees on the Marne

(According to Thos. Atkins)

By Emerson Hough

Oh, the English and the Irish, and the 'owlin' Scotties too. The Canucks an Austreyleyuns, and the 'airy French Poilu. The only thing that bothered us a year before we knew Was 'ow in 'ell the Yanks 'ud look, and wot in 'ell they'd do.

They 'adn't 'ad no trynein', they didn't know the gyme, They 'adn't never marched it much, their shootin' was the syme, An' the only thing that bother'd us that day in lawst July Was 'ow in 'ell the Line'd 'old if they should run aw'y.

Them leggy, nosy new 'uns, just come across the sea, We couldn't 'elp but wonder 'ow in 'ell their guts'd be An' the only thing that bothered us in all our staggerin' ranks, Was wot in 'ell 'ud 'appen w'en the 'uns 'ad 't the Yanks.

My word, it 'appened sudden when the drive 'ad first begun. We seed the Yanks a runnin', Gaw Blimey, 'ow they run, But the only thing that bothered us that seed the chase begin Was 'ow in 'ell to stop 'em 'fore they'd get into Berlin.

They didn't 'ave no tactics but the bloody manual, They 'adn't learned no orders but 'Oooray and give 'em 'ell, But the only thing that bothered us about them leggy lads, Was 'ow in 'ell to get the chow to feed their "Kamerads."

So we're standin' all together in a stiffish firin' line, If anyone should awsk you, you can say we're doin' fine, But the only thing that bothers us, and that don't bother much Is 'ow in 'ell to get the dirt to bury all the Dutch.

Gaw's trewth, it's rotten fightin' that all our troops 'as seen, The 'un's a dirty plyer, 'cause 'e 'as always been; But the only thing that bothers us in 'andin' 'im our thanks Is 'ow in 'ell we'd done it, if it wasn't for the Yanks.

Oh, the English and the Irish, and the 'owlin Scotties too, The Canucks and Austreyelyuns, and the 'airy French Poilu, The only thing that bothered us-don't bother any more-It's why in 'ell we didn't know the Yankee boys before.

SNAPSHOTS SNAPSHOT BILL

FROM: Snapshot Bill. TO: Everybody.

SUBJECT: Merry Christmas, etc. Ladies and Gentlemen: At this time of the year when even we who dwell in tents are stealthily enlarging our stove-pipes so that Santa Claus may the more easier get our presents to us, we wish to announce a special interview with the old gentleman which we obtained through military channels together with the able censorship of our own censor.

The subject of our interview was, to be truthful, the result of an altogether altruistic journey on our part to the North Pole so that we might tip off Mr. Claus as to what some of our dearest friends wanted badly for Christmas. The result of our perigrination drew the following promises from the said resident of the ice regions.

FOR THE EVENING BOOB.

- 1. Another war.
- 2. One steel rattle. One Conscience.
- 4. One backbone.

FOR OLD LADY EXPRESS.

- 1. One nurse for one child.
- 2. One night cap.
- 3. One box sleeping powder. 4. One Liberty Bond.

FOR E. Y. WHITE

- 1. One Dyeing pair of pants.
- 2. One honest woman.

FOR FRED ARCHAMBAULT.

1. One bottle teething syrup.

2. One Motion Picture House.

FOR THEATRE MANAGERS. 1. One box at their own shows.

2. Another epidemic.

FOR THE SAINT ANTHONY.

1. Cellar prices on the roof.

2. Ten cent calls to Kelly.

FOR EVERYBODY ELSE.

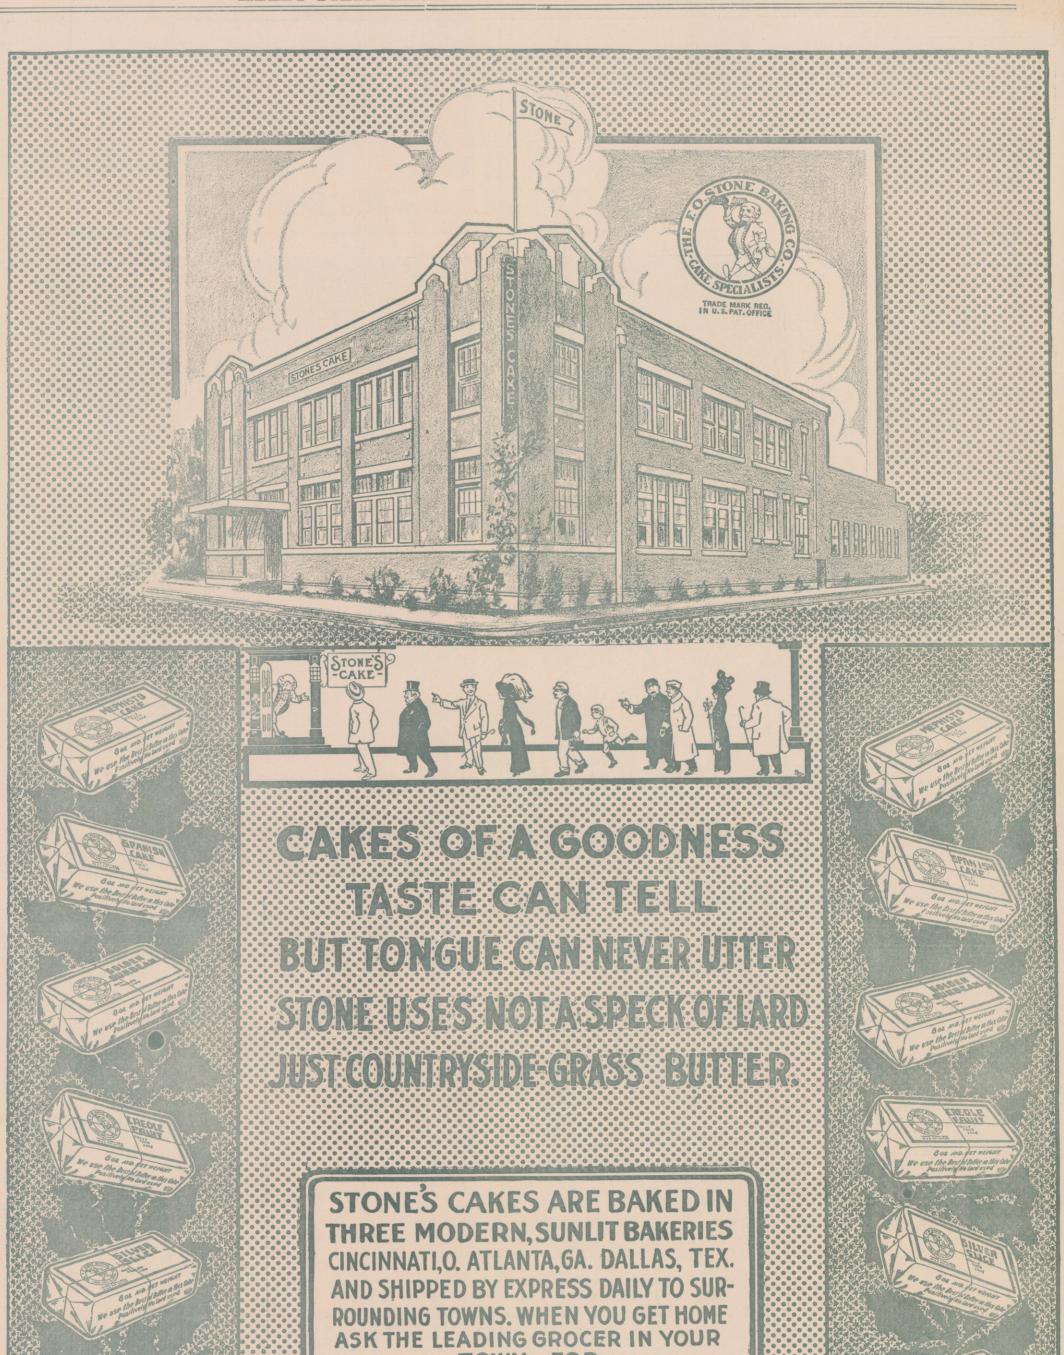

- 1. A Merry Christmas.
- 2. A Happy New Year.
- 3. Continued Prosperity.
- 4. A Kelly Field Eagle There you have it straight from

the old man.

The band will now play Annie Laurie with ILLUSTRATIONS ON THE SIDE.

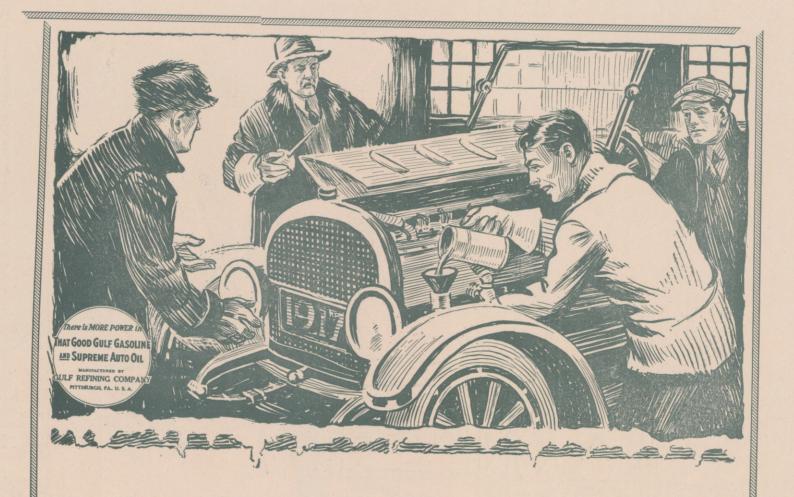

Merrily yours, SNAPSHOT BILL.

Since the organization of the unit last May, it is estimated that its speedy members have flown over 540,500 miles, a total of 16,000 miles for each bird or 500 miles per week per individual. The birds are all highly pedigreed stock, purchased when young by the government and trained by army experts.

Homers are used extensively on the Advanced Cross Country Stage for carrying messages, and are particularly handy in case of emergency or accident. Not long ago a pilot ran out of gasoline and was forced black and red and the feminine gento descend far from any habitation. der with blue and yellow markers. He released his homer and the faith ful little courier brought help in a short time. On another occasion, give each one an equal share of the the motorcycle attached to the loft, flying. broke down out on the road, and again a swift flying bird proved the salvation of the stranded party.

Sagacity is Remarkable.

The sagacity of the birds is remarkable and they return home in record time in almost every case. Even when thrown out of a plane this manner. Whenever it is necesthat is above the clouds, they soon sary to send fuller details, a breast shaking up and strike a bee-line for which fits around the body of the their head into the wind, as otherwise they will be inverted, very much like an umbrella on a March day, and be sucked in by the current from the propeller. Altitude does not seem to bother them in the least. Many have been released at bell, which is attached to the trap, 8,000 feet, even on rainy days.

Beautiful colors predominate, all shades of gray and blue being represented, alternating in many instances with white and darker hues. Their eyes are particularly intelligent and the birds move around ance, illness and death are sent in quickly, always on the alert.

majority of cases from Vinck, Peter- just as in the case of a soldier. son and Webber, all nationally known fanciers of San Antonio, and several of them are descendants of Webber's champion, who holds a record of 700 miles between suns.

Birds Are All Exercised.

Fifty minutes, morning and afternoon, is devoted to exercise, while the loft is being cleaned, and during this time the birds are required to remain constantly on the wing. A bird that alights on loft, tree or any other nearby object is poorly trained and worthless for military purposes. During the exercise period a flag is raised on the loft, and the pigeons continue to circle ing gas attacks. until it is taken down. It's like the "top" sergeant's whistle to a recruit. tremely important, a tiny capsule is This method gives them eighty used, being pushed into the bird's miles per day flying, which keeps craw and later carefully worked out them in tip top condition at all times, by massaging without injury to the ready for duty on a minute's notice. pigeon. The Germans are said to

Homing pigeons are fed twice daily and will eat about one pound this ingenuous means of communiper week apiece. The food consists cation. of a standard mixture of Canadian peas, milo maize, or Kaffir corn; rice, wheat and vetches. Hemp they show any initiative are turned seed is also fed in small quantities out alone. Gradually they are taken and is an especially favorite with farther and farther away from home the racers, serving them as a sort and soon learn to return without of dessert, and being offered at the assistance. Birds Carry Tags.

Each bird carries an identification band made of aluminum around his leg, which bears his number and in addition to this colored celluloid bands are used for rapid identification, the males being labeled with This is done to assist the men handling the birds, and enable them to

The messages are carried in small aluminum capsules, which are attached to the legs of the messenger with copper bands. As the contents are written on tissue paper of the thinnest description, a great deal of information can be transmitted in get their bearings despite the rude pouch made of cambric is used, the loft. They can be released bird under the wings. This pouch while the ship is traveling at full is capable of carrying fifteen feet speed, but it is necessary to point of moving picture film, a large map or several photographs. This device is fastened with clasps similar to those used on ladies gloves.

As soon as the bird returns from a flight, its arrival is made known at once by the ringing of an electric or entrance to the loft. An attendant at once feeds the traveler makes a note of his condition and the time absent. Careful records are kept of each homer and reports as to their health, flying performregularly to Fort Sam Houston, the The birds were purchased in the Southern Department headquarters,

Baskets Are Transports.

Baskets of all sizes are used to transport the pigeons in the field, ranging in size from the two bird basket, used by aviators, in which the birds are sandwiched like shoes in a box, to the large hamper affair, which will house the entire colony. The baskets are made of closely woven wicker and can be made both air and waterproof by the adjustment of outside oilcloth coverings. This has been done in the war zone repeatedly and saved the life of the winged couriers dur-

The Officers

By Lieut. Wyatt Barbee, Garden City N. Y.

(Apologies to Kipling.) Oh, I've taken this war where I ve found it.

And I've had me a hell of a time, I've had a collection of officers, And four of the lot were prime. One was a kid from West Point, And one was a duffer and also a bluffer.

But the fourth put his nose out of joint.

I was a rookie to start with Green as the grass in the dell Captain McMullen he took me, And the Captain was rougher than hell.

Two decades he'd been in the army-Two days since the draft took me in! But he taught me the way to squads right in a day,

And I learned of the army from him!

Then I was shifted to Kelly, Or I might be cussing him yet; Drew me a second lieutenant, No brains, but a whole lot of pep, He thought he new more than the colonel,

But the C. O. was wiser than sin. And he shipped him one day, to a field far away.

But I learned about shave-tails from

Then I was transferred to Gerstner, Though I thought it was time to go 'cross:

Got me a Captain from West Point, Who soon let me know who was boss. I told him I was a mechanic He said I looked more like a bum, So I had to K. P. and serve the ice

tea, And I learned of the army from him.

Then I came up to this country-Along with a train load of men, In charge of a U.S. R. Captain, A soldier he sure loved his men! He taught us how to be soldiers, We planned for the battles we'd win, And the powers that be sent him over

him!

Yes, I've taken this war where found it,

I've soldiered afar from its sound, I wanted to kill off the Germans,

found. So when this old war is over, And a lot of civilians we'll be-My children can hear, at all times of the year,

Of the Long Island Battle from me! -OLE SCOUT.

LINER BRINGS BACK MANY YANK PRISONERS

Former Kelly Man Appointed to High Post in Washington

Col. Thomas Duncan has been appointed assistant to the chief of the training section of the Air Service, according to advices from Wash- issued the early part of the week ington. This is one of the highest and forwarded to Major John H. position in the Air Service, being under the direct supervision of Major General Kenly.

he was executive officer, summary their application court officer, post inspector, survey officer, and even acted as commandto Wilbur Wright Field, Fairfield,

Lt. Miller Returns From Air Trip Home

Makes Journey of More Than 3000 Miles At Average Speed of 70 Miles

When Ship No. 20 came to earth the Flying Department last Thursday, an airplane trip of more than 3,000 miles had been completed in the remarkably good time of 45 hours and 35 minutes flying time at an approximate speed of 70 miles per hour.

First Lieut. Milo H. Miller, pilot of the machine, left Kelly Field on the morning of October 31, his destination being Waterloo, lowa, where he went to visit his parents. His absence of five weeks was caused to a large evtent by unfavorable weather. trouble also was responsible for some delay.

The journey of 1,250 miles from Kelly Field to Waterloo was completed in 16 hours and 5 minutes, which is considered exceptional when the fact is taken into consideration that the weather was unfavorable and the engine faulty.

Spends Five Days at Home the sea,

But we learned of the army from parents, Lieutenant Miller took the at 9 o'clock on the morning of November 8 and turned the nose of his plane toward Kelly Field. He was forced to land that afternoon because of a broken valve. The valve was soon repaired temporarily and Omaha reached at 2:25 in the afternoon. Here after go-But mosquitoes are all that I've ing over the plane it was deemed necessary to tear down the engine and order new parts from Speed-way, Indiana, the great auto racing center. At this point a spell of unusually disagreeable weather set in which made further flying impossible until three weeks later.

The flight was resumed at 9 o'cleck December 3 and from that time on some of the best time of the pilgrimage was made. MANY YANK PRISONERS

An American liner has sailed from a French port for Rotterdam, with 96 American officers and 2,000 men who have been prisoners of war in Germany. They will stop in France for a short time before being brought to America.

He pilgrimage was made. Lieutenant Miller arrived at Okmulgee, Oklahoma, at 3:30 o'clock and spent the night. The next morning he ascended at 8 o'clock made Rich Field, Waco, taking gas en route at Love Field, Dallas. The ship left Waco at 7:30 o'clock on the morning of December 5 and completed the last lap of its tour at noon.

Air Service Club Gains 240 Members In Campaign Here

TWO hundred and forty officers in Kelly Field made application for membership in the Air Service Clubs Association, according to a letter Packard, secretary of the association in Washington, D. C.

This number is a large per cent of the officers of the field. The When Colonel Duncan, at that committees who were appointed to time Lieutenant Colonel, arrived at look after the canvassing of every Kelly Field in November 1917, he as appointed post inspector. Later plished. It is thought that several branch, have been likely commendother offices were given him, until more officers will probably forward in the association to the secretary in Washington, within the next few days, but it was definitely stated ing officer of the Post for two days. that no more would be received by He was transferred in June, 1918, the authorities here who had charge of the work. The list of new members obtained during the campaign Ohio, where he was commanding and which was forwarded to Washofficer, until his recent transfer to ington did not include the names of officers in the field who are already members of the association.

Bits of Verse

ENLIST AT YOUR TRADE.

In red and white and blue, The message ran "For Uncle Sam, Your country calls to you. The U.S. A. needs you in France A chance for you is made, The Ordnance Corps, needs thousands more,

Enlist now at your trade."

I read that sign, believed each word, a war to a peace footing. Gave up my job and pay, My work I'd do, till war was through, While in the U.S. A. The ledger that I used to run While working in a bank, I left behind and then I signed, And my last beer I drank.

But since I entered Army life. "Tis sad to say but true," Of things I've done, there isn't one, That I signed up to do. I've loaded cars with T. N. T. On guard I've done my trick, And in the mud, a ditch I dug, They handed me a pick.

I've made up beds and picked up butts,

I've drilled from morn till night. A boulevard I've pounded hard, And stacked up dynamite. I've polished shoes and shoveled coal Till every bone was sore, I've cut down trees and on my knees I've scrubbed the mess hall floor.

I've waited on the officers, I've been a kitchen cop, I've greased up pans with blistered hands.

And stairs I had to mop. A thousand windows I have cleaned, Washed clothes the whole day through:

I've helped to bake and cut up cake, And peel potatoes too.

But at a book ne'er got a look As called for by those signs. And if at war, for volunteers, Another call is made, I'll grab my pen, sign up again, But never at my trade.

SONG OF THE AVIATOR.

(Ry Hart Jonks.)

The mottled blue So old, so new, And how like a lover it calls So smooth, so true, So treacherous too, Yet free from the throttling walls.

The bleared mist-rim So weird and dim That circles the flat painted plain Beholds me skim Around the brim Of mountains, of mist and of rain.

What thrills are here As now I steer High over a round painted dish, So small, so near, So mottled, clear, As slowly I roam where I wish.

A pause, a roar, A dive, a soar, I battle with giants unseen, Behind, before, And more and more, 'Till, panting, away I careen.

I drop and swoop, Then rise and loop, invert with my belt pressing hard, Till down I droop, Gain speed and scoop Off into a level retard.

Oh walk, or ride, Or sail, or slide. But never my joy will you know Through skies so wide To rise and glide, In poor little earth there below.

Now low, now high, Aloft in the infinite blue, Just God and I, Alone we ply Away with my "ship" running true,

I fly and fly,

To Erect New Steel Hangars.

Sells Uniforms To Officers At Cost

Standard cloths for officers' uniforms have been adopted by the army according to general orders recently issued. All uniforms for officers made in the United States after December 1, 1918, will be of one of the following prescribed standards For coats, breeches and overcoats 12-ounce worsted serge, 16-ounce whipcord, 21-ounce whipcord or elastique and 20-ounce melton. For riding breeches, 23-ounce Bedford cord, and for overcoats 32-ounce melton or kersey. For coat and breeches, summer wear in the United States and in Tropics only: olive drab cotton, 13-ounce all-wool worsted gabar-

Carries Complete Stock Now.

The Quartermaster Corps will, after December 1, 1918, carry a supply of these cloths and officers can purchase their personal requirements at the Government prices. Samples of the cloths, with the issue prices, will be kept on hand by all camp, cantonment and post quartermasters, where they may be examined by the officers. Stocks will be carried at the beginning at the following depots only: New York, Washington, Atlanta, Fort Sam Houston (San Antonio, Tex.), San Francisco, Chicago and St. Louis, but this list will be extended from time to time as cloth becomes available.

The Quartermaster General is to determine by thorough investigation a schedule of fair prices for making uniforms, including all necessary trimmings, linings, etc., but not including the cloths and is to prepare a list of responsible tailors who will agree to make uniforms for officers at the schedule rates. The Quarter-master General will guarantee to the tailors the collection of bills for all uniforms ordered through his representatives. The schedule of prices, the list of tailors agreeing to make uniforms at these prices and the regulations governing the sale to oficers of the standard cloths, placing of orders, the acceptance of uniforms ordered and the payment of bills will then be published to the service.

Ready-to-Wear Uniforms Too. The Quartermaster Corps is also instructed to arrange to supply from stock at cost, made up (ready-to-wear) officers' uniforms. These are to be provided in only two types of cloth for coats and breeches, 12ounce worsted serge and 20-ounce melton with 32-ounce melton for

An adequate supply of uniforms tjoining hangar No. 1.

N. W.), and it is expected that an These new hangars are to be adequate supply can be provided at December 1 and later at all depots and camps. I

The uniform of peace

WHEN you change the uniform of war for peace clothes, don't change the spirit in which you wear them.

You're proud of the uniform now; get one for peace you'll be proud of; all-wool fabrics, perfect tailoring, smart style.

> We've always made that kind of clothes; before the war, during the war; we shall go on making them as long as we make any clothes

Hart Schaffner & Marx

Clothes that save

OUGHT TO BE M. P.

NOT long ago a fresh bunch of rookies arrived at Kelly Field and were greeted with the usual facetious remarks: "Look at the ears on 'em." "Where you fellers from?" "How do you stand in the draft?" and the like.

One of the recruits, hailing from the hard boiled district in the neighborhood of Sixth Avenue, New York, did not care for this sort of amusement, and the query

'Where you awl from?" proved particularly hard on his nerves. That afternoon he went down to take his trade test and the large quantity of questions fired at him did not improve his already sadly ruffled temper. Just as he was leaving the building, he was greeted with: "Hey, where do you belong?"

Quick as a flash the infuriated East Sider wheeled about and snarled through set teeth: "Say, don't git fresh wit me, guy, or I'll change yer map, see? What the hell's it to you where I hang

The questioner proved to be one of the Trade Test Board officers, who was looking for an orderly to send a message and wanted to know if "Eats Nails" was available for the errand.

The hard boiled 'un was.

TIMES IS CHANGED

It was "Stunt" night at the up-A quartet (?) had gargled a few popular songs, and the crowd was calling for more. "Smiles!" they shouted. The quartet sang "Smiles."

"Sing 'Mother Machee!" pleaded another. 'Mother Machee" was

"OVER THERE!" suggested a "bright" one.

For a second there was a pro-found silence. Then a book sang through the air, and the "wit" crumpled up in his seat.

WALLINGFORDITIS

Now if Francis Meiers had only dreamed of \$1,000,000 or a chest of Spanish gold or something specific instead of just plain money, this might have been worth a longer story.

As it is, Francis, who is assistant supply sergeant at the 145th Squadron, comes across with this in evidence that dreams come true:

"The other night I dreamed of money at the post office corner on the Fio road. That following morning I walked out of my way to pass that corner for something seemed to tell me to go there When I got to the corner, What should I find, but money—35 cents—a quarter and a dime."

C'MON LET'S PLAY

He was a husky, big truck driver, broad of shoulder, thick of chest and strong of arm. His mouth was firmly shaped and seemed to show grim determination. He was a type of man the movie director picks for a hero, the kind a poet raves about and the story writer makes the subject of a prose epic.

He stood before his commanding officer at attention-rest-

attention-rest.

the officer, after sizing up the

husky youth.
"Sir," began the truck driver in a piping voice, "I would like to get a furlough."

"What do want a furlough for?" the officer asked.

"I live in Kansas, sir, and I have been in the service five

months and haven't seen my Mamma in all that time." "And then he broke down and

Extra! M. P. Speaks Truth

AT the Travis-Kelly football game a newspaper reporter was yelling his head off for the Aviators to score when along came an M. P. decorated with a blue hatcord. The two had battled verbally just previously as to the right of "Scoop" to follow the ball up and down the field,

the latter winning the debate. "Whater you doin' yelling for Kelly?" the guardian of the military peace wanted to know.
"Thought yer said yer was a
newspaperman."
"Well, I'm supposed to be," de-

fended the Kelly fan.

"That old stuff don't go with muh. You get back in the stand with the rest of 'em," snapped the banded one. "Don't you think I'm wise enough to know all de newspapers is agin Kelly "

MAYBE NEVER

"When will we be discharged?" asked Sgt. Bill Anthony, telephone exchange chief clerk, Sgt. Arthur Dee, also of the telephone office.

"When I pay you that five owe you," was the hard boiled reply.
"And when will that be?"

"I don't know."

SOME DIFFERENT

This one is told on a bunch negro recruits. The incident of negro recruits. occurred the morning after they in camp. They startled from their sound slumbers by the sonorous and insistent notes of the bugler blowing reveille. None of them paid any attention to it except one darky who sat up and shouted: "You all bettah get up! Dat ain't yoh mothah callin' you up, boys; dat's yoh uncle talkin' to yoh now."

THE MAN'S RIGHT

TWO negro soldiers paused before the big merry-go-round which was operating on Houston street last week.

One wanted to ride, the other didn't.

Air Service Clubs Show Spirit in New Membership

Headquarters calling a meeting of all a board of governors. officers of the post who desired to At about this time motions were

An executive committee, consisting of Major Jack W. Heard, chairman; Major Raycroft Walsh, and Captain J. M. White, was appointed. This committee formulated the original by-laws of the club, which, with few amendments, stand effective to date.

According to the provisions of the circular of organization it was necessary to have 250 members before the club could be amalgamated with the United Service Club. On February 2, since organization the custom of the 1918, there were but eighty members club to give a regular Friday night enrolled. Therefore it was necessary again to remind the officers of the guests only were entitled to attend. post of the benefits to be from enrolling.

Amalgamation Complete.

Amalgamation with the United Service Club of New York City, which has headquarters at Hotel Mc-Alpin, explained the circular of February 2nd, entitles members of the Aviation Club to the use of the finely equipped club rooms of that organization at the McAlpin in New York. This includes care of correspondence, cashing of checks, and other such small courtesies which a club can render members. Also, all members of the Aviation Club are permitted to give to their friends visiting New York Club privilege cards, which entitle them to the same consideration which would be given the member himself. These eards may still be secured from the secretary and treas-

The executive committee, at their first meeting, fixed the initiation fee at three dollars (\$3.00) and this fee included the first months dues. Monthly dues thereafter were fixed at one dollar (\$1.00).

Charter members of the organization, the executive committee decided, were those who had joined previous to and including January 10, 1918, and such officers were furnished with "charter membership cards."

February 26th, 1918, Lieut. Robert G. Elbert was voted Secretary and Treasurer of the Club, and at the same meeting the following officers were elected: The Commanding Officer of the post, president; Lieut. Col. G. V. S. Quackenbush, acting Commander, president pro-tempore, and Lieut. Col. G. E. Goodrich, Majors R.

Gives Chorus Credit For Success of Show

Washington, D. C .- Authors and actors and managers and musicians may have their reasons why a musical show will or will not take with the soldiers, but the French idea of "Cherches la femine" is at the bottom of it all, according to one member of Uncle Sam's army, John W. Edelman, Company E, 73d Infantry. He says:

"The success of a musical show in a plain civilian theatre may rest on the knees of the gods, but in a Theatre, it certainly is Liberty poised on the toes of the maidens of the chorus. Even the app keeps time to the step of Even the applause dances when a girl and music show play at the cantonment. trinsic quality of music counts for very little, the scenery may be perfectly crude and the humor fetched from afar off, but what puts the entertainment over is the fact that pretty women dressed in pretty dresses are performing.

Famous Gosport System Wins Favor with Directors of American Aeronautics

the course of a few weeks all instruc- progress. tion at this post will be under that famous method.

in command of a small flying school at Gosport, England. He did not immediately publish his method, but exwhich he commanded. Finally it was noticed that his school was turnflyer than was usual, and an investiinstruction used by Colonel Smith- which, if the stick is undisturbed, it the same time. Barry; with the result that his system, since named the Gosport, was adopted in the British Army.

U. S. Makes Improvements.

The American application of the famous British method may be considered an adaptation rather than an adoption, as many and extensive improvements have been made. By means of this system of instruction one flying officer gives the cadet the entire course, in the American application beginning with a talk and extending on through the advanced acrobatics which are necessary to attaining a flying commission.

Formerly there have been a number of stages: dual, first solo, second solo, cross-country, acrobatic accuracy and many subdivisions even of these, and as the student became proficient in one stage he was advanced to another. There now remain at the Flying Department but five of these old stages, which are the Second Solo "B," in charge of Lieut. Joseph W. Benton, assisted by Lieut. Archie W. Swanson, Cross-Country, in charge of Lieut. Robert L. Copsey, assisted by Lieut. Fred H. Steil; Acrobatic, in charge of Lieut. Joseph L. Whitney, assisted by Lieut. John W. Schroeder; and Accuracy, in charge of Lieut. Chauncey M. Larsen. All of these are gradually being depleted by the graduation of students to higher stages and will be discontinued in the order in which they rank.

The Gosport system presents many salient advantages over all other methods of instruction, and chief at any angle above the horizon, howamong them is the use of the speak- ever until it reaches the stalling Lieut. Flight Surgeon's Vital Problem on Kelly Field

FREQUENT Tests of Physical Characteristics of Cadets and Officers Acts As Great Safeguard Against Accidents on the Field.

THE FLIGHT Surgeon's Office Flying Department, is equipped with the most modern and uptodate apparatus known to science, and the work done by its trio of experts is responsible in no small degree for the high record for efficiency and low accident rate enjoyed by the birdmen of Kelly Field.

All flying officers, ground officers taking flying instruction; cadets and enlisted men who frequent the ozone are re-examined every six weeks by either the Flight Surgeon or one of his assistants, and the test they are required to pass is just as severe as the entrance examination for the flying branch of the Air Service.

Home Ties Needed.

Mental attitude of the wife br mother of a flyer often plays a leading role in deciding whether the work of the bird is above par or otherwise. In many cases an unusually good pilot suddenly slumped in his work, worry over home conqutions has been found to be the cause. This has often been the case even when the aviator in question was in perfect physical condition.

The flight surgeon acts a kind of big brother and confident to all flyers, regardless of their status, and all of them are urged to be frank when questioned as to just what is troubling them, and thus reacting on the quality of their work. Cheerful thinking, self-confidence, repose are all very important adjuncts to successful flying and encouraged

Colds in the head, earache, indigestion and other apparently minor affections also seriously impair the efficiency of pilots and are closely Surgeon. poor condition, making their task doubly dangerous. The practice of never examining a man after he was commissioned unless he had fallen was found to be the very height or folly. Mental depression was also found to be a powerfully detrimental influence, despite the fact that it was often only some imaginary ailment or premonition of disaster resulting from a dream.

U. S. Studies All Problems.

When Uncle Sam threw down the gauntlet to the Kaiser, he determined that all American youths who volunteered for aviation should be given all the safeguards possible, and with this end in view called on all specialists of the heart, lungs, eye, ear, nose, throat and nervous diseases to enter the service. As soon as the Air Medical Department was organized, the Medical Research Laboratory was established at Mineola, Long Island, to study all problems affectlies. Since that time, hundreds of highly trained men have been sent out to the flying fields all over the country and scores to France, where their services have doubtless saved

One form of insanity, for which particularly strict watch is kept by flight surgeons, is known to the

One of these "bugs," without any ed what he was doing he informed Flight Surgery is a scientific and his mechanic he was "looking for around and saw Joe on his knees in the cockpit praying."

As a rule cadets are very reticent ; regarding anything hat may may be worrying them, fearing that they will be taken off of flying or thrown out entirely. These men when commissioned change their attitude entirely and talk quite freely, admitting in many instances that they have been unfit for first rate flying for some time past.

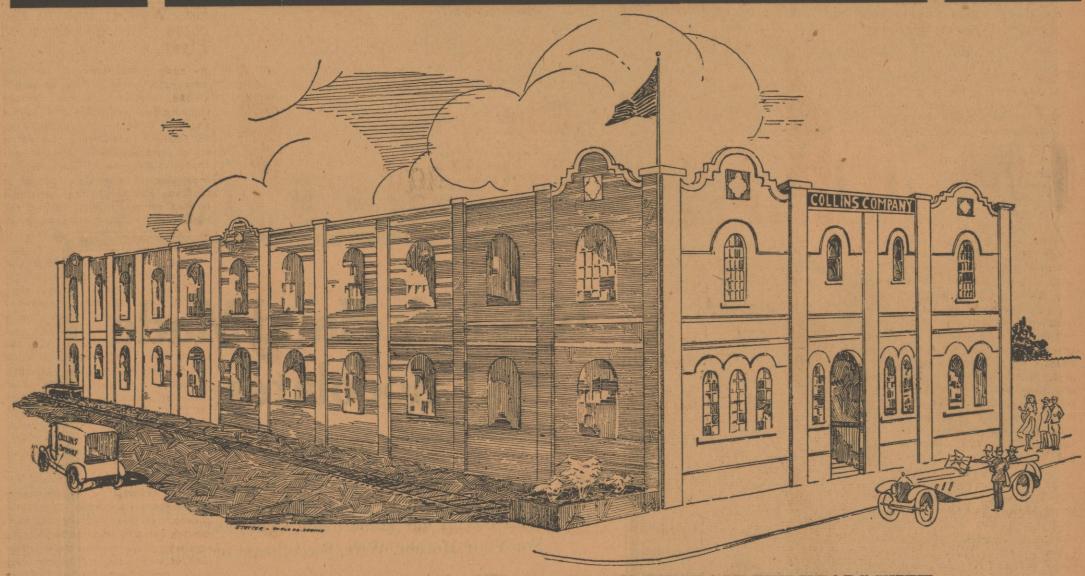

The Kelly Field personnel consists of Major Charles W. Kollock, flight surgeon; Captain Martin H. Urner, and First Lieut. Charles E. Holgate assistants. H. H. Manchester, writing in The American Machinist (New York, October 24,) notes that the use of fire in war is represented in a bas-relief found at Nineveh and believed to have been made in 800 B. C. It showed besieged soldiers hurling fire-brands. The ancient Greeks, as frequently recorded by their historians, were familiar with this method of warfare. The Romans used "liquid fire"-doubtless burning bitumen or naphtha; and a Chinese warbook of the fifth century B. C. gives recipes for certain inflammable mixtures to be used as weapons. Says Mr. Manchester:

"A picture by a Chinese artist, dated perhaps 1000 A.D., shows that such inflammable materials were frequently made up in tubes of bamboo, which were cast at the foe. PSYCHOLOGICAL Effect of Proceedure Was One of Its Chief Virtues As a Weapon of Authority—Romans Used Burning Liquid.

Thrice this night did they throw the fire from la perriere and four times from crossbows. Each time that our good king Saint Louis heard them discharge the fire he cast himself on the ground and prayed.' Twice the Saracens with this fire burned the castles protecting the camp.

"An interesting medieval picture illustrates a great throwing-machine hurling a hogshead of fire in much the same way as described by de Joinville. In this case the throw was accomplished by hauling down the long, light end of the beam to which the sling was fastened, inserting the hogshead in the sling and letting go, whereupon the falling of the tremendously heavy end of the beam whirled the sling up and over and cast the hogshead against the enemy.

"In a later battle, according to de Joinville, "their infantry ran toward our men and burned them with Greek fire, which they cast from instruments made for that purpose.'

"The use of fire continue I for some time after the discovery of gunpowder. Konrad Kyeser, for example, in 1405 illustrated man on horseback, above whom floats a fiery dragon similar to those used by the Chinese in comparatively recent times. A a cavalryman who has in front of him a hollow statue from the mouth of cart upon which is the figure of a wreaths of fire against the besiegers."

American Aviator Wins French Cross For Bravery

LIEUT. Walter V. Barnebey Left Work in Canal Zone To Enter Air Service and Won Recog-nition for His Remarkable Exploits on French

LIEUT. Walter V. Barnebey, a young flyer of the A. E. F., before joining the Air Service was employed in the Panama Canal Zone on underground conduit work. His superior officers in the Air Service feared he would not make good as a flyer, as he learned slowly, but he persevered and finaly won his wings. Then he had to be reprimanded for taking chances. His first technical offense was looping the loop ni a machine not designed for that work. When asked why he did it, he said the French told him it could not be done and he wanted toshow them that Americans could do it. Barnebey's work over the lines in bringing back niformation was remarkable and it was while starting on one of these trips on May 22, that he was killed. He had reached an altitude of 4,000 feet when the machine was seen to go into a tail spin. He succeeded in righting it and was flying level, but crashed into the side of a hill. He failed to regain consciousness. An American officer of the 3rd French Corps, to which Lieut. Barnebey was attached, pinned the Croix de Guerre with palm on the dead flyer who had been previously recommended. The letter follows:

"It was raining yesterday so there was no flying, and as it was Sunday I went down to the village church for a change. It was a beautiful service and all in French, of course, so I understood very little. There was an organ, and the girl of the viltage played the violin, and there was good singing, too, all of which sounded so good after listening so tong to nothing but the roar of motors and the booming of guns. The old priest, before he began the sermon, read the French communique and his eyes glowed as he read tt. The young priest, who was here before the war, is now in the trenches and the villagers say he is some scrapper. I understand that many of the priests of France enlisted as privates and they all have made splendid records for them-

Must Be Careful.

airplane is another important work his outfit is always a volunteer. "It is the observation planes that the enemy spares no expense or at a distance, and at close quarters of the observation squadron. In this machine is always the objective of exploding close by sounds more like on a point concealed from observaaircraft batteries, for he has to fly like a gas shell exploding on the an important group of guns, etc., where only an airplane can see it. Some pilots do not like this sort of work, as it is long and tiresome circling around between battery and target. Yet there are some pilots who like it the best. The observer is a highly trained specialist who after row, as fast as each row of watches the fall of the shells on the planes would reach the enemy, they target and sends wireless messages back, ordering the necessary correc_ tions. By cooperating properly with "Many of the new big machines ues his mission. Nothing matters to making his first few trips over the the observer, the pilot can help are more complicated and more dif- him except those pictures he must lines, it seems as though the entire make the work comparatively easy take and deliver to his home station, output of Krupp is concentrated in and swift. He flies back of his own front lines as much as he can, for just as soon as he comes in reach of them the enemies Archies open up and cameras with plates, etc., it in are delivered in a very few minutes shells burst they make a dense on him. So every circuit he makes is irregular and at varying altitudes,

"I know a little pilot who really must be the speed, and consequently be packed with men. The French timed their shells at too great an side slips his machine down toward their first week at the front."

HAD To Be Reprimanded Several Times for Taking Chances — Officers At First Thought He Would Never Become an Experienced Flyer.

the guns, outmaneuvering the gunners' calculations. Then he spirals around, dips and climbs, always thinking just a fraction of a second ahead of them.

"Artillery regulation is carried on at a comparatively low altitude (about 1,200 meters) the heighth depending, of course, on the size of the guns, and the distance the target is back from the lines, so that the herizontal visibility must be good. In reconnaisance work an observation plane goes into enemy territory, sometimes a long distance back, and gathers information of enemy positions and movements. In this work, as well as in all other observation work, the pilot and observer must be a perfect team so that four eyes can see as two, and two brains can act as one. And they must know just how to fight together, for their machine is the special object of all chasse of the neighborhood and they are nearly always attacked by more than one machine, so each must know just what to do to meet every rapid maneuver of the many planes that sometimes attack him.

Another Important Phase.

"Now we come to the last phase of aerial observation, 'Infantry Liaison,' contact between the advancing infantry and the supporting artillery and headquarters. This kind of work does not happen very often, fortunately for us, as the mortality is very high, indeed. It happens only when an assault is being undertaken, and it calls for the most experienced observers and the most skilled pilots. It is often necessary to fly very low, so low that the enemy chasse planes make no attempt to bother the enemy depending on their machine guns on the ground to bring them down. These planes are the means of communication between the advancing infantry, which is sometimes so isolated as to have no other method of sending back word to the artillery in the rear and headquarters. They also keep headquarters informed of any new and unexpected develop-

"This class of flying in clear weather is very interesting indeed, as one can see the whole battle being waged below. In foggy weather or rain it is just plain hell. It is then the most nerve straining of all flying. Aerial observation is ing field should be discouraged. Naturally he never has to ask for volunteers for "Regulation of artillery fire by a perilous mission, for every man in

> "Just before General Foch took over the command of the Western Front, through lack of unity of action, a big gap was made in the allied lines, and a German army was marching toward that unoccupied territory. The British Air Service saw it and sent every plane available over with hand grenades, explosive bombs, and machine guns. They flew almost wing tip touching wing tip as wide as that gap, and row would pour their ammunition into the advancing masses, make a wide circle and return to their bases, load up with gas and oil and ammunition and return to the assault. They lost many planes, but what of it, they held that gap until it was closed and shattered a German army.

"American observers have made good at the front. They are a cool, nervy, wide awake bunch of young chaps. I hope that all the pilots glide to earth at a certain relative changes and movements. Major Hanks came to Kelly the 10 companies in the wing were Field from Washington and was credited with a strength of 200 soon put in command of the brigade men each. When the wing was and held the position until relieved filled to 2,000 men, the next wing about a month ago to assume his was to be formed and so on, until new duties.

Never Formerly Recognized.

Although the Concentration Brifor months, and the fruits of it have proven beyond a doubt that it is the only system that can be adopted and used in the Air Service, it has never been formerly recognized by the officials in Washington. The brigade is simply a depot brigade in the Air Service, but due to the fact that it has never been regarded as such, orders pertaining to the depot brigades in other branches of the service have had no effect on the brigade here. There is not another field in the Air Service that has an organization that works so smoothly as the one here, although they have been modeled from it

Plans for caring for the great influx of drafted men who were to report here starting November 12, but who were ordered not to tice had been signed was made public the morning of November 11, were made by the officers in authority of the brigade and all work pertaining to them was to be handled by it. In fact minute details had been so worked out, that to handle 30,000 men as it was 1,000. The officers who are now in charge of the brigade are as An Aerial Battle With follows: Lieut. Col. Bruce D. Buttler, commanding officer, Lieut. Seward C. Simons, personnel adjutant, Capt. Charles H. Austin, executive which Lieut. Peno Fonck, the officer and Capt. Horace Soule, ad- famous French ace was also partici-

handling of men as fast as they are received, so that they can delay necessary in organizing a squadron; hence in the plan worked here a Provisional Aero Company has been established, instead of a squadron unit, to which men will be assigned. The companies are brought together in a wing which as regards size and administrative character, closely corresponds to a aviators and myself flew over the

Marshal Foch Tells His Theory on Winning the War

RATTLE Is Lost Only When One Gives Up, Allied Generalissimo Declares in Interview With Correspondent — Had ematically.

"One Who Knows Him" gives a sketch of Marshal Foch in the London Sunday Pictorial, which explains why the retreating Germans were unable either to understand or withstand the attacks of the great French commander. It reveals a character rather different from that which the newspapers have impressed upon the public mind, but the picture is none the less interesting and soul-filling. His theory of war, translated into Yankee terms, seems to be that the army that "never knows when it is duct, and conversation, to say nothlicked" will always be the winner.

one will not admit oneself van- tell of his chivalrous attitude toward quished."

Soldier's Lack of Hate is One of War's Peculiarities

Cases Where Allies Have Gone Out of Their Way To Help Wounded Enemy Are Plentifully Cited

is one of the paradoxical but cheering manifestations of the war. Though he has seen hell let loose he can speak of his brutal foe with a calm ters: that is bewildering to the civilian. The blood has often boiled as we militiarism clung fast to its principle have read of wanton destruction of property and pitiless cruelty to people helpless in the German's hand. An intimate picture of the French soldier's attitude toward the German is given by Dr. Karl Reiland, of St. George's Church, New York. Dr. Reiland was asked by the Red Cross to go before the men in the cantonments here and present particularly to them the assurance of the care their families would receive from the from an army of their countrymen, Red Cross while they were absent in France. He felt, says the New York are giving their lives without a Sun, that "it was not right for any man to appear before men who were going into the inferno of the battlefield unless he, too, knew something of what they were to go through." So he has visited the battle-line from Soissons to Rheims, and his testimony on the particular point we mention is valuable for those who hold bitterness in their hearts toward a defeated foe, particularly those of them who were helpless instruments in the crouching. That was not enough to hands of ruthless leaders. He says:

French Element With Hun.

fered at the hands of Germany, her soldiers have the least hatred in gas. their hearts and display the most kindness toward the German prisoners of any of the allied soldiers. Why, when I was talking to the little Boche in the hospital a French general who was passing through the ward came up, looked down at him, patted his blond head, and sighed with a shake of his head, "Too young! too young for war!'

"I saw another French officer lift ered, when he put the pillow back.

last is not changed, as is shown in the Boche."

How the soldier views the enemy | the dispatch dated November 11 to the New York Times by Walter Duranty, concerning the fate in the very last hours of the struggle of the city that had been the Kaiser's headquar-

"Even in its death agony German of hideous savagery. All this morning the German batteries have been pouring a deluge of high explosives and poison gas on Mezieres, where 20,000 civilians-men, women, and children—are penned like trapped rats without possibility of escape.

German Atrocities Continue.

'Words can not depict the plight of the victims of this crowning German atrocity. Westward the broad stream of the Meuse cuts them off whose soldiers, maddened to frenzy, thought in the effort to re-inforce under the pitiless hail-storm their scanty detachments on the eastern bank. For the moment no other succor is possible. * * *

"At six last night the torment of Mezieres began. Incendiary shells fired a hospital, and by the glare or a hundred fires the wounded were evacuated to the shelter of the cellars in which the whole population was appease the bitter blood-lust of the Germans in defeat. Boat.

The idea of the submarine, like vices, is very old. The necessary materials and the means of realizing their ideas were not in the possession of the early inventors, but some of them did surprisingly well with those at their disposal. In The American Machinists (New York, June 27) H. H. Manchester traces the idea of the submarine to the efforts of divers to remain under water longer than nature had furnished them the means of doing. When those efforts took the form of vessels containing air and large enough to hold the diver himself, he may be said to have evolved the germ of a submarine. With some means of propulsion added, even of the rudest form, the resemblance went a good us that the romances about Alexander the Great gave free vent to the beneath the sea, and several of the trating them. He goes on:

Submarine as Early as 1320.

"In one of these miniatures, the date of which is about 1320, we see a large glass barrel resting on the bottom of the sea and occupied by the King. Chains for lowering and raissurface. While this illustration is vessel was a distinct advance, and neath the sides of ships, letting in marks what might be called the first step from diving apparatus to sub- them to sink."

"A direct application of this conception was made by Robertus Valturius in 1460. The design he show- ployment of submersibles. ed was for a boat of the form of a cylinder with a pointed prow and stern. Both the prow and stern were detachable, so that the boat could be was probably made by William

submarines seems to be the one by ever since. Olaus Magnus, the Bishop of Upsala, in his 'History of the North,' published in Latin in 1555. He declares: 'Half-way to Greenland there is found a kind of pirates that use leather boats. By a method of navideal further. But leaving diving opera- at hand, and it involved principles of lows: tions aside, the next notice taken of displacement that have been applied

> "A somewhat similar construction 1605, and Lorini in 1609 describes a rigid column and a caisson for submarine work.

"The next noteworthy effort in submarine building was by Cornelius van Drebbel in 1620 and subsequent submarine use, which he made waterwhat was then considered the remarkable success of his vessel. Drebbel claimed credit for an even more important invention in 'the composition of a fluid that would speedily restore to the troubled air such a proportion of vital parts as would make it again, for a good while, fit for respiration.' Possibly he had some recipe for releasing oxygen from water, but he died in 1634 without disclosing this part of his secret.

"In 1634 Mersenne proposed a submarine with a metal hull which should be spindle-shaped, so as to allow progress in either direction. His plan was also to have cannon with lids at the mouth which would open at the moment of discharge, and fall back into place immediately after-

"A few years after this there came

David Bushnell's "turtle" submarine is familiar to students of our revolutionary history. In a letter to Thomas Jefferson, Bushnell wrote:

"An oar formed on the prinicple ishment of the British. of the screw was fixed in the forepart of the vessel; its axis entered the vessel, and being turned in one diward. It was constructed to be turned

Its adventures are related as fol-

"A torpedo with a clockwork time discharge was fastened at the stern of the Turtle, and the idea was to posal for a barrel-like submarine with was proposed by Magnus Pegelius in bore a hole in the bottom of a ship, fasten the torpedo, and get away.

Christmas

THE VERY WORD fills us with joy this year. THIS Christmas has a NEW meaning for all of us. It is a different day from those that have

gone before—a Christmas of new hope, new thought and new life. The transition of a year-from war to peace-has been a transition from madness to gladness—a change from grim determination to blissful smiles and cheerful satisfaction that at last has been achieved real "peace on earth-good will to men."

With our hearts filled with gratitude to those who have borne war's heavy burden, we turn to the new day and new tasks at hand and wish everyone a genuinely

Merry Christmas

Kelly Photo Hut of Great Value to Development

RESIDES Taking Pic-Is in Laying Out Map Work Through Aid of Aerial Photography.

AERIAL Section No. 39, better known as the "Photo Hut," with headquarters in the Flying Department, is a remarkably efficient organization and is doing a work that is second to none on the field, the importance of which it would er quantity of terrain can be in- food andlodging for the entire party. ing, cooking and heating purposes, be difficult to exaggerate.

The Section was organized last March and since that time has not only photographed everything of interest on Kelly Field, but has also taken care of the wants of the adjacent army posts, including Brooks Field, Camp Stanley, Fort Sam Houston, Camp John Wise and Camp Travis. In addition to this every foot of ground within a radius of one hundred miles of San Antonio has been snapped from the air and it is estimated that in this work alone more than 100,000 exposures have been made.

Took Motion Pictures.

Besides taking pictures of all buildings on the field, both inside and out, viz: Hangars, machine shops, Y. M. C. A. huts, K. C. Halls, the various headquarters and barracks of the personnel, both enlisted and commissioned, this unit recently took motion pictures of formation and stunt flying for the Committee of Public Information, which will be exhibited in all the large cities of the United States. These films were made under the supervision of an expert from Washington and were an exceptional success.

The most important and interesting feature of the work done by the "Photo Hut," is the aerial map making of the surrounding country, the snapshots being taken from an airplane flying at a height of from 7,000 to 10,000 feet. They are made on a plate 4x5 inches and after being developed and printed are enlarged to twice their original

When the enlargements are completed, an expert in this line is set to work putting the numerous prints together, very much as a child assembles a Chinese puzzle. When the fact is taken into consideration that these maps contain anywhere from 180 to 4,000 separate and distinct prints, it can be readily seen that this step is quite a complicated one. As the various exposures resemble each other very closely, it would be almost impossible to tell one from the other, if the system used in taking the pictures did not result in each one of the many units overlapping its neighbor about half an inch, which simplifies the task of uniting them to a great degree.

United States Geographical Survey records of that scientific bureau.

Pershing Tells How America Won War

COMMANDER in Chief of American Forces Tells Graphically of Victories Won By Yankee Fighters—Report Is Remarkable Document.

THE MEASURE OF DEFEAT experienced by the Central Powers and Germany in particular is best illustrated by the fact that submission to the Allied belligerent armistice terms was complete. Prussian pride, long one of the chief bugaboos set up by the Junker Jingoists, has been humbled by a crushing blow delivered with the advent of American Forces on French battlefields at the psychological moment.

America arrived at a time when the whole civilized world was in the depths of misery and fear. The German military machine which for four years had plunged the world in blood had not been conquered and, in fact, even the most enlightened of our leaders had come to believe that such a deliverance was impos-

great volume of our artillery fire and our sudden approach out of the

"Our First Corps advanced to Thiaucourt, while our Fourth Corps curved back to the southwest through Nonsard. The Second Colonial French Corps made the slight advance required of it on very difficult ground, and the Fifth Corps took its three ridges and repulsed a counter-attack. A rapid march brought reserve regiments of a division of the Fifth Corps into Vigneulles in the early morning, where it linked up with patrols of our Fourth Corps, closing the salient and forming a new line west of Thiaucourt to Vigneulles, and beyond Fresnes-en-

"At the cost of only 7,000 casualties, mostly light, we had taken 16,000 prisoners and 443 guns, a great quantity of material, released the inhabitants of many villages from enemy domination, and established our lines in a position to threaten

"This signal success of the American First Army in its first offensive was of prime importance. The allies found they had a formidable army to aid them, and the enemy learned finally that he had one to reckon with."

The report shows for the first time officially, that with this brilliantly executed coup, General Pershing's men had cleared the way for the great effort of the allies and American forces to win a conclusive victory. The American Army moved at once toward its crowning achievement, the battle of the Meuse.

The general tells a dramatic story of this mighty battle in three distinct phrases, beginning on the night of September 27, when Americans quickly took the places of the French on the thinly held line of this long quiet sector. The attack opened on September 26 and the Americans drove through entanglements, across No Man's Land to take all the enemy's first line positions. Closing the chapter, General Pershing says:

"ON NOVEMBER 6, A DIVISION OF THE FIRST CORPS REACHED A POINT ON THE MEUSE OPPO-SITE SEDAN, 25 MILES FROM OUR LINE OF DEPARTURE. THE STRATEGICAL GOAL WHICH WAS OUR HIGHEST HOPE WAS GAINED. WE HAD CUT THE EN-EMY'S MAIN LINE OF COMMUNI-CATIONS, AND NOTHING BUT SUR-RENDER OR AN ARMISTICE COULD SAVE HIS ARMY FROM COMPLETE DISASTER.

Used 40 Divisions.

"In all forty enemy divisions had been used against us in the Meuse-Argonne battle. Between September 26 and November 6 we took 26,059 prisoners and 468 guns on this front. Our divisions engaged were the 1st, 2nd, 3rd, 4th, 5th, 26th, 28th, 29th, 32nd, 33rd, 35th, 37th, 42nd, 77th, 78th, 79th, 80th, 82nd, 89th, 90th, and 91st. Many of our divisions remained in line for a length of time that required nerves of steel, while others were sent in again after only a few days of rest. The 1st, 5th, 26th, 42nd, 77th, 80th, 89th and 90th were in the line twice. Although some of the divisions were fighting their first battle, they soon became equal to the best."

The commander in chief does not lose sight of the divisions operating with French or British armies during this time. He tells of the work of the Second Corps, comprising the 27th and 30th divisions, in the British assault on the Hindenburg line

New York, Dec. 7 .- The news in-

dicates that when the major baseball

leagues get under way again next spring virtually all of the star play-

ers of both leagues will be on deck once more in their usual positions

Relatively few of the men in the big leagues are in France, for only

a small proportion of them enlisted

in either the army or navy before Secretary of War Baker upheld Provost Marshal General Crowder's

promulgation of the work or fight order. There is no doubt that if the war had gone on the big league

players would have been sent to

France in large numbers, but with the signing of the armistice, coming only two months after the ball players were ordered to get into

the army, it was not to be expected that there would be many of themoverseas. Walter Pipp of the Yankees and Tris Speaker of the Cleveland

Indians are the first of the big league stars to apply for discharges.

Both are in the naval aviation serv-ice, but under the orders of Secre-

tary Daniels, it is probable they will

charge before many days have passed. Both are eager to get back

into baseball, and will report to their old clubs for the regular spring training trip in the South.

field, and all crew reports. time production was at its maximum in the rigging to denote that it is not here that the Curtiss Company were producing four hundred motors and cadets. monthly. At Kelly Field three hundred and fifty motors were completely built over! This involves as much labor and time as does the building delicate nature of the duties required of a new motor complete.

New Planes Are Built.

bers painted on the lines covering. accurate diagrams, and their work These six ships in the course of a few has been worthy the master. days were soon flying regularly.

It is interesting to note that only about ten per cent of the ship and rigid inspections are required daily. as a rule, and the crew-chief or man nel in the engineer department, it in charge of the ship does not leave until he is satisfied that both snip and motor are in perfect condition for flying the next morning.

The Experimental Department has also played an important role in the making of Kelly Field. They have at their disposal a plane in which they try out all new devices and fixtures to improve the airplane for this climate and atmospheric conditions here. Extensive experiments are made that flying may be made safer.

The immensity of the repair and rebuilding facilities of the Kelly Field Flying Department shops is staggering to the mind of the uninitiated and few officers and men have a full realization of the work being done here. With the exception of wires, linen, steel and instruments it is possible to make every piece and part of an airplane at Kelly Field. This is also the case as to the motor with the exception of large castings, such as crank cases and shafts, cylinders and cam shafts.

CORPUS CHRISTI

The Steves Sash & Door Company

Wishes the men of Kelly Field and the Army everywhere

A Merry Christmas

A Happy New Pear

It is not pleasant to be away from home at this season of the year. We are sorry we can't invite you all to take Christmas dinner with us in a good old home-like way, but there's only one of us and many of you, and our table isn't big enough. :-: :-:

Best wishes to you all, and may you soon be back where you long to be---HOME

To Be Home Builders

The Sacred Privilege

To be builders of homes—not merely sellers of lumber is the God-given heritage of the lumber industry, and should be treasured as such. Not merely to traffic in the barter and sale of boards; not merely to labor with the desire to turn virgin forests into profits; none of these things are the heritage of the lumberman. A higher and greater gift has been given them—and the time of their awakening to that splendid and inspiring fact is at hand.

The dearest thing to the hearts of any right-made man or woman—next to cherishing each other and the little ones that Providence has sent them—is the desire for a home. It is a charm that creeps into the hearts of rich and poor alike; it is a bond of kinship between those who labor and those who are blessed with this world's goods. To own a home. To say as you return from your day of labor—whether it be from field of waving corn, or from mahogany desk—"this is my hearthstone," brings a satisfaction so filled with goodness and so free from alloy, as to deserve the name of blessed.

Now is the time to build that home. You can build any type of building without restrictions. Command of us any information you may desire in your building problem.

Out Door Sports Abound in San Antonio

Golf, Tennis and All Aquatic Sports Indulged in, the Year Around. Game Fish Plentiful at Medina

THE fishing and hunting inducements offered to the lovers of these outdoor pastimes by San Antonio and its vicinity are unsurpassed anywhere in the world, and those followers of the rod and gun who have been fortunate enough to try their luck here return again and again.

Lake Medina is one of the most beautiful bodies of fresh water to be found on the American continent and its black bass are noted for their size and gameness. It lies about thirty-five miles northwest of the city limits and covers an area of 448,000 acres, its elevation of one thousand feet above sea level making it cool, even during the hottest summer weather.

The lake, which has been created by the damming of the Medina river, is located in a beautiful setting, surrounded on all sides by mountains; is as large as Lake George, the famous New York resort, and contains 98,000,000,000 gallons of nature's sparkling bever-

This huge reservoir was built primarily as an irrigation project by a British syndicate and represents an expenditure of seven million dollars. Its constructors own 60,000 acres of land adjoining the lake, on which they expect to realize a handsome profit when the irrigation system is

Black Bass Plentiful.

Black bass and other large game fish are found in its waters in plentiful numbers, many specimens of the former weighing as high as nine pounds having been snagged. In fact the bass at one time proved such easy victims of the hook that it was necessary for the legislature of the state to pass a law limiting the number of fish allowed caught by each person. It is not unusual for local followers of Isaac Walton to reach their limit by noon. The open character of the lake makes it an ideal spot for fly fishing, and the well-known fighting disposition of the bass adds greatly to the pleasure of the sport offered.

In addition to the bass Medina's fish, better known as perch to the also make their home here in large all the time!" quantities and can be hooked every few minutes in the day.

Ample provision have been made for the comfort of the visitor, and in case he does not prefer to run his own camp, which is quite the rage, accommodations satisfying the most exacting can be had at reasonable prices. For this purpose a large number of tents, screened and floored, have been erected and can be rented, and restaurants boasting attractive menus abound.

In summer, the altitude makes even the warmest day seem delightful and the large number of springs, which feed the lake in addition to the river, save campers the trouble cheer. Over the back of each chair of having to contend with the ice was hung a pair of the old faithful man. The bubbling, never failing socks or stockings, according to the . Trail Drivers a Factor in Texas Development

Dauntless Courage and Industry Displayed by These Pioneers, Gave Impetus To Early Expansion of State

EW people realize the important role played by the old-fashioned Trail Driver or Overland Cattle Pioneer in the development of the great Southwest.

After Lee had surrendered to Grant at Appomattox hundreds of gray clad veterans returned to their homes penniless, to face an uncertain future. The only thing that remained to them was a large surplus of live stock, which had accumulated as a result of lack of transportation, and the extinction of the market. Realizing that something must be done, and done quick. several venturesome cattlemen drove small herds to New Orleans, Baxter Springs and Abilene, Kansas, where they realized handsome profits.

Despite the hardships and dangers experienced in exploring the partly civilized and unexplored country, the success of the initial drives spread like wildfire, and in the year following, 1869, many others followed the lead of the pioneers.

Soon it became not so much a question of making money as to get rid of the surplus stock at any price. The cattlemen had little if any ready money, and there were no banks or trust companies to finance the adventurers. Some drove their own stock and others bought on credit, promsing to pay on their return from market. The only security offered or asked was a list of the various brands and the amount due the owner.

A New Industry Springs Up.

The years 1870 and 1871 saw a huge increase in "trail driving," tossled heads on a downy pillow for long anyway ere he will be back sprung up all over the state. They rushed around in all directions, contracting for cattle for delivery the man from the far northland, while those who had outgrown the charm-The finance centers of the North They merely will grab li'l, ol' guy filled the respective socks and stock optimism and are booking up another and East were quick to see the advantage of establishing business re "Thas all to the tobasco, Kis, ol' kid, the thoughtful gifts of the Yuletide. tial home-coming of the soldier boy in lations with the rapidly growing in

Not warned, not to enter mess halls on long after this Texas brood mares Christmas Day and give the men of became in demand, which turned out to be a bonanza for the ranchers, who owned thousands of them and had never been able to sell them at any price.

Gradually the traffic became less year by year until 1895 when it closed, but not until it is estimated 8,400,000 cattle had gone to market via this overland route. As they brought in the neighborhood of \$10.00 per head the trail driver gets credit for adding over \$84,000,-000.00 to the wealth of the state and nation, which otherwise would have lain dorment for many years. In addition to these figures, over ten million dollars worth of horses were disposed of by the same

Use of Dormitory Is Given to Army Men leaving Camp

"Soldiers discharged from the army whose homes are not in San Antonio need assistance more at this time than any one I know of," said Charles Wuest, one of the pro-prietors of the Travelers Hotel yes-

terday morning.

Mr. Wuest not only thinks this way but is backing up his statement with action and is spending money to do so by inserting an ad-vertisement in The Eagle this week, offering the use of the hotel dormitory to honorably discharged sol-

diers, until they obtain positions.

This offer is not meant as charity. The proprietors of the hotel want the soldiers to come as their guests and they will be treated as

The dormitory of the Travelers is one of the most attractive places in The beds are the same as are found in the regular room, with fresh snowy linen and blinkets. Shower baths, shine chairs, ice containers are other conveniences.

It is a temporary period of financial embarrassment for the men getting out of the army and back to business. Men who had the best of the land before they went into the army are coming out without a penny. Most of them gove what they had to their families and sold their clothes. With their insurance tax and their purchases of Liberty Bonds and Savings Stamps, they have practically nothing left to tide them over their discharge period.

'We feel that this is a time when we should try to do our bit as they have done theirs," said Mr. Wuest, "and we feel proud to lend this assistance to help them over this last mile."

Kelly M. P.'s Find Two Stolen Cars

Thieves Abandon Machines When They Become Disabled and Strip Off Everything Detachable

The military police department of Kelly Field recovered two stolen motor cars for Lieut. Thos. F. Murchinson of this field and Judge J.

F. Carl of San Antonio last Wednesday evening.

The two machines were left standing in front of the St. Anthony hotel Tuesday evening while the owners attended to business in the immediate vicinity. When they returned the cars were missing. The San Antonio police as well as the military police in the various camps and fields about the city were notified and a hunt for the machines was soon under way.

The car belonging to Lieutenant Murchinson was found just off Carson street in San Antonio where it had been abandoned when a connection of the batteries became loose

tion of the batteries became loose the engine hit the bumper of his causing the machine to stop. Judge Carl's machine was found on South Laredo street by the Kelly Field sleuths but it had been roughly handled by the culprits. Everything about the machine had been detached even all the tires on the whole first five cars on the cocond and a control of the bumper of his truck, turning it around and throwing it clear of the track. According to the report filed by Hynes the first three tracks at the place he control one, as a switch train was on the ed, even all the tires on the wheels, speedometer, horn and other freight train on the third. equipment.

thieves has been found.

Army Engineers Do Great Work on Kelly Field

REMARKABLE Mechanical Efficiency of America's Greatest Aviation Field Is a Monument To Officers and Men Who Planned It.

VILLA had been indiscreet, and Mexico was misbehaving.

A second lieutenant in the Nebraska National Guards, a well known figure on automobile speedways, angrily condemned administration and the military establishment in general for keeping him in leash when there was action and fighting.

Then, when his despair was darkest, Kismet sent her alluring challenge! Fate called, and he well knew the call and hastened to answer it.

The Aviation Section of the Signal Corps wanted air pilots and two officers were to be appointed from each state's National Guard Regiments for aerial training.

He Gets Appointment.

Fortunately, his name and fame were sufficient to procure his appointment to ground school and later Edward J. Bagnell, automobile racer and candidate for the greatly coveted silver wings of the flying officer, went to Hazelhurst Field, Mineola, Long Island, to receive flying instructions.

Then came April 6th, and to Kelly Field he was sent, wearing silver bars now and those shining silver wings on his breast. Then and there began the organization of the Kelly Field Engineer Department, unexcelled by none in the service today!

First Lieut. E. J. Bagnell was assigned as Engineer Officer, and to him were alloted several small buildings, where the Trade Test Board is steel; which has kept the Engineer airplane manufacurers of this counnow located, and what later became Department supplied for the last the old 110th Aero Repair Squadron year. This was another judicious purto organize an Engineer Department chase on the part of this far-seeing for the Aviation Center of the United officer, because in order to manufac-States Army. out landing gears at the rate of twelve per day, and all other wooded members were completed in proportionately rapid time. This was a remarkable achievement, in view of the conditions under which this department was organized, and the executives deserve full credit.

Woodworking Is Started.

In the early days of Kelly Field the woodworking department was started in connection with the experimental and repair building at Kelly No. 1. The personnel consisted of but six men, with M. S. E. Randall in charge. This was in the administration of Lieutenant Bagnell and the enlisted men were from the 110th Aero Repair Squadron.

Even at this early stage propeller making, which has since become a very important section of the of "injudicious expenditure" of Sig- vulcanizing department; Lieut. Bag- in making the Engineer Department woodworking department, was intro-This was unheard of as field work not only in the United States but even in the allied armies in Europe.

Kelly is one of the few fields equipped with a separate woodworking department, all other stations doing this work in connection with their airplane repair.

The woodworking department was transferred along with the rest of the Engineer Department on that epochal Sunday morning in October he American soldier, and particularly when "Happy" Bagnell moved the department in its entirety to Kelly Field No. 2, and was then separated from the Experimental and Repair and given an entire building where it is now located.

Here the shop was taken over by Lieutenant Goodnow, assisted by Sergeant Bigelow, and the enlisted personnel was increased.

Up to this period a large part of United States to be the most up to the work was maintenance, but from them on the manufacture of airplane parts was gone into extensively.

December of 1917 found Lieut. important work. Much additional mafrom the outside, but still he knew ties, all specialists on some unit of chinery was added, by which a great

National League Loses Two Splendid Men in Action

Greater Portion in Khaki or Blue

"Eddie" Grant and "Mark" Milligan Are Lost Heroes

More than half the baseball players who were actually on the payrolls of the eight National league clubs for the greater part of the season of 1918 are, or were up to the time the armistice was declared, in the military or naval service of the United States.

Statistics compiled by President Heydler of the veteran league show that 103 of its players donned the khaki or the blue. This means actual service in the army, navy or aviation. The total number of players reserved for the season of 1918 was 257, and over 40 per cent of that number joined the colors. But of the players who actually reported

Achieve Splendid Baseball Record Aviators

Diamond Season Proves Victorious One For Kelly Field Baseball Aggregation

A challenge resulted and the lirst battle was one long to be remembered. The Aviators hammered Jack Harper, former Texas league star for eight innings before they Talent—Win Memorable Battles

BY WAYNE K. OTTO.

A cold disagreeable April wind sweep over the field one day last April when Kelly Field's warriors of the diamond trotted out in their initial battle of a super-eventful season. The New York Gaints were "Rarin' to go "that afternoon, but it was only after a bitter nine-inning fight that they overcame the

and first baseman, duplicated the stunt the next afternoon.

Larry Richert and Rabbit Lentz were fighting it out for shortstop at that time, with Heine Spreitzer at second, Eddie Brown at first and Jack Gilroy on third. In the outfield Wylanis, Starr and Schnaars were playing fair ball. Regardless of these conditions, the club went to Waco and won an even-break in two games before a mammoth crowd pitted against a club which out ranks nine-tenths of the minor league organizations in the country. Coming home, the club was beaten badly by the Wacoans when Lefty Walkup and the late Frank Blanch and the Assacrations are placed brown, the greatests hitter in United States service baseball, went to was based in the club went of the season class of the season clas

both big leaguers.

O'Connor Takes Charge

It was then that Lieut Harry G. O'Conner was named to lead the club, replacing Lieutenant Semple. A shake-up in the personnel was imperative if the team was to win and this is exactly what Connor did. With the second big clash against Travis' magnificent club only a few days off, the "Foch of Kelly Field" sent Spreitzer from second to third, relieved Richert, who had other duties, sprung a dark-horse in the person of Joe Fernandez at second and left the, outfield intact with the exception of Chief Starr, whom he howshed. Grown Kelly harded it to him, makes the fact even more dommendable. The co-operation and wisdom of Lieut. Malefski, as head of the athletic department, equaled the work of the brilliant baseball leader.

The Powell Studio San Antonio, Texas Synder of the St. Louis Cardinals, considered by many experts as the best backstop in the National League. with the exception of Chief Starr, whom he benched. George Kelly was in the hospital and the hurling staff was an enigma, or rather in-consistant. "Red" Lynch, whose backstopping was erratic at the start of the season, was rushed into the breach to relieve Billy Harm, the little Columbus catcher, generally known as a "second Ray Schalk."

Going into the ninth inning, two runs to the bad, the Aviators staged a wonderful rally with two men out

Undefeated Grid Champs of Southern Department

Here they are! The Kelly Field Aviators-football champions of the Southern Department. With their goal line uncrossed throughout a victorious season the Kelly griders proved themselves to be one of the greatest football machines ever to don the moleskins anywhere. The players are: From left to right—Top row: Ross, Dailey, Hodgson, Fraser, Johnston, Byrne, Sweinhart, Galvin, Shephard, Lieut. Clough, Brewer, Sullivan, Downey, Sherwood, Cauvthan, French. Center row—Fyan, Walters, Sidenberg, Title. Bottom row—Overlees, Dahlem, Newton, Flasher, Krapf, McHale, Splawn, Harper, Bingaman, Simms, Guy.

Kelly Field's Famous Grid Machine Finest Outfit in the United States

Aviators Easily Prove Supremacy in Race for Titular Football Honors of Southern Department—Great Galaxy of College Stars

BY ROY C. ELMENDORF.

FOOTBALL champions of the Southern Department for the 1918 season. That was the record established by the mighty Kelly Field gridiron warriors this autumn.

Devotees of America's great fall pastime, who had the op-portunity of glimpsing the Aviators in action, declare the team the greatest aggregation of football talent ever to don the

moleskins on any greensward.

The Kelly Field team consisted of big college and All-American players of recent years, who proved that they had lost none of their former prowess in romping the limed lines.

The Aviators established the season's record of having their goal line untramelled by an enemy's cleets. In fact, the Kelly Field goal hardly was in danger throughout the season. The only team able to score was Camp Travis. The Doughboys secured the oval by a fumble on the 25-yard line and Burch hoots. on the 25-yard line and Burch booted a goal from the field giving his team three measley points and him the honor of being the only man to score against the Kelly Field outfit. The locals tallied 161 points, while the three points made by Travis were their only demerits. The influenza epidemic and the

developed by the Kelly coaching the latter part of October and up staff. In action the outfit worked to Thanksgiving Day saw the Aviawith the smoothness of a new Rolls- tors bloom forth in all their splen-

A TRIBUTE.

At evening time when I sit down to write a note or two, I fuss around and fret around and kinda cuss and stew, until, when all amb tion's gone and I am feeling mean, I get an inspiration and I use this little scheme. I take a paper from a book and in it pour some stuff and then I roll it round and round until it's round enough. I scratch a match and with its flame I quickly touch the tip. I take a puff. The flame goes out. I give the match a flip. And then I write with ease and speed, with accuracy and grace, and keep right on a writing with that snicke stuck in my face. Soon then, all my writing's done. I'm gladit's done you bet. I drop the thing I owe it to-my good old cigarette.

WHAT BOTHERS 'EM.

It is easy enough for the Huns to see how they secured the iron cross, the French the

AMUSEMENTS

Famous Kelly Field Players Make Trip To New Braunfels

Eight-Act Vodvil Bill To Be Presented At Request of Mayor

FOR the first time-For the first time the Famous Kelly Field Players are to be seen outside of the city of San Antonio and for the first time the residents of New Braunfels are to see a soldier show.

All this happens today when seventeen members of the Amusement unit make the trip to San Antonio's suburban resort to play a two-night engagement at the Opera

The engagement comes as the result of a personal request from the mayor of New Braunfels that the Players give their show in the town that has been the mecca for pleasure seeking soldiers since the establishment of camps in San An-

Arrangements have been made by the mayor and the officials of the town to personally meet the soldier vodartists as they arrive in town, and the Boy Scouts have arranged for a band to escort the players from the station to the hotel.

The townspeople are enthusiastic over the contemplated visit of the Kelly Field men and the Players are as enthusiastic over the idea of giving their performances before civilian audiences.

The eight-act vodvii bill to be presented at New Braunfels has the endorsement of the commanding general of the Southern Department, the commanding officer and the official staff of Kelly Field and of various San Antonio civic organiza-tions. The request of the Mayor of New Braunsfels was prompted by the endorsement of Mayor Bell of San Antonio, who is heartily in fa-vor of the Players as a traveling organization.

Lieut. Bruce Cleveland will accompany the Players on their trip which will include not only New Braunfels but one night at Floresville, where the American Red Cross is taking care of all armorements.

All the proceeds of the tour above the producing expenses will be turn-ed over to the War Service Board

in San Antonio. The Players and the acts to make the trip are: Bob Carrick, Baron Beatty, Erickson and Unger, Pierre Le Maire, Blough and Fields, How-ard Melson, O'Connor and Keyes. Mack and Hamel, Bill Copeland. Harry Byers, Ken Warfield and Will Reynolds.

Big Austin Crowd Applauds Glee Club From Kelly Field

WORD comes from Austin that fully 3,500 persons attended a concert given in that city Sunday afternoon by the Kelly Field Glee

The concert was given in the Senate Chamber of the Texas State Capitol and was a complete success from an artistic as well as from an attendance point of view. Several solos, sung by members of

the club, were enthusiastically encored. One member of the club who imitates a ukelele made an individual hit and was the recipient of a red rose thrown upon the stage

by a girl in the audience.

The audience joined in and sang several of the songs, among them the army stammering ditty "Katy" with the "Pershing" chorus which has been made famous by the Kelly

The members of the glee club were entertained in Austin homes during their stay in the city.

"Kick In" Director Now at Waco Camp

Harry Stafford, well known New York producer, who had personal direction of the Kelly Field Players production of Willard Mack's famous crook play, "Kick In," last July, is now dramatic director for the War Department Commission on Training Camp. Activities, at Camp. Training Camp Activities at Camp MacArthur, Waco. He is at present busily engaged on vaudeville bills for presentation at the base hospital and for Motor Transport troops.

Amusement Officer Returns Tomorrow

Lieut.S. B. Jacobson, amusement officer, who has been in New York on leave for the last two weeks, is expected to return to Kelly Field

Bob Carrick has a few surprises up his sleeve and is promising to "knock 'em outa their seats" with his new numbers. "Scotty" also is acquiring some new wardrobe. "If I had ma deescharge," he says, "the outfit wud be complete."

elected assistant chef of the 145th, "Charlie, the dummy, has been goldbricking." 'Turn about is fair play,' Charlie says, "Frank's been gold bricking long enough. If he didn't have me, he couldn't do an act."

Ken Warfield is now advance man

Abe Frankel Now Director of First Air Service Band

AFTER but two months' association with the First Air Service Band, the Flying Department's authorized musical organization, Sgt. Abe Frankel has brought the outfit up to the point of excellence that it has evoked much favorable comment from Colonel Clagett and other officers of the field.

Ever since he came to the field last December, Frankel has been active in musical circles here and up to the time he was made head of the Flying Department band, was director of the Kelly Field orchestra and assistant to John Weber, leader of the Kelly Field band.

As a solo violinist, Frankel is extraordinarily talented, and he has played on most of the programs presented by San Antonio musical clubs, since coming here. He received his musical education in Vienna Conservatory and in New York. Just before coming to Kelly Field he was director and concert master with the Henry Savage concert companies.

Baron Beatty Says

MERRY CHRISTMAS, everybody. Say, girls, did you ever meet the hick who let's you stand under the mistletoe for an hour and never take's the hint. May all his children be book agents.

Did you ever meet the bird who said he's going to wear a wound stripe because a San Antonio girl broke his heart? Knock 'im off while he's happy, boys.

Contrary to custom, I'll now sing a little song entitled "I May Be Here for a Long, Long Time."

Eddie Tout, cellist with the Kelly Field Trio, has been made "top kicker" of the "Fighting 145th." The Amusen to be "lopping off" all the regular jobs in the Squadron in the Squadron.

William Steiner Leaves.

To "Wear-Ever" Men!

No company has for its returning men a welcome more sincere than your company has for you.

Proud, indeed, are we of what you have done-proud of what you were willing to do.

Your jobs are waiting for you -every one!

Other jobs will be ready soon for at least a few other men who have had some sales experience and for more men who have had no sales experience but who wish to get it.

If you are an old "Wear-Ever" man or if you are a possible new "Wear-Ever" man, we suggest that you write us, stating just WHAT you would like to do-and WHEN.

Rend Centry been appointed commanding officer of the Second training Brigade, which comprises all men quartered in permanent barracks.

Formerly officer in charge of flying at Kelly Field. Later he was reduced the Event of the Event Central Cent

Announcement of the gift was made by Lieut. Earl David, Post Exchange officer Monday morning. Checks for the amounts each organi-

Checks for the amounts each organization received were mailed Monday afternoon and Tuesday morning.

In discussing the distribution of the dividend at this time, Lieutenant David said that it was a Christmas gift from the exchange to the men, and that the plans of demobilization had only hastened the distribution of the money. The organization wants to give the men the benefit of the dividends as they are earned, as men are being discharged from as men are being discharged from day to day and they want everyone to have as much use of the money any of the dividends from the exchange and it is no doubt very much appreciated by the men who are taking flying instructions

money given them, and he believes that every man was getting his share of the dividends. He stated that one squadron has taken the money and purchased a traveling bag for each member, another had been having extra good "chow," while others were using it for dances and theater partice and in the mose halfa as well.

ties and in the mess halls as well.

It is probable that in the future the dividends from the exchange will be very much smaller than they have been in the past, as the price on nearly every article has been cut, so that the men will receive the dividend as they buy the article. This plan was decided on, following the announcement that men would be discharged from time to time, and the council wants every man to get in on as much of the dividends as possible.

Second and Third Wings Are Merged

Section of Concentration Brigade Formed To Care for Large Influx of Men Is Disbanded

The Third Wing of the Concentration Brigade has been merged into the Second Wing, and officers who were on duty with the organization have been assigned to duty with the Second Wing and other divisions in

jutant of the brigade. There were about 100 men in the wing and all or them in the same company. Enlisted men who were on special duty with the wing have been scattered over the Training Brigade where they were the training Brigade w the offices of the Second Wing and

to Field Headquarters.

The Third Wing was only organized a short time ago when it was announced that nearly 30,000 drafted men were going to be sent here from various states in the west. The men who were in the company were for the most part those who had arrived in the field but a few weeks ago and were unable to be placed in the Sec- plane Department. ond Wing as it was filled.

Growth of Development Battalion Is Rapid

The Development Battalion in Kelly Field is gradually growing into one of the biggest individual organizations in the field.

More men are being placed in the battalion from day to day according to Lieut. H. W. Herlihy of the Con-centration Brigade and the practice will continue as long as there are any men who are physically deficient in some way. Men have been transferred into the organization within the past two weeks until now it num-

Men have been selected from the various squadrons in the field and other organizations and put in the

"Flu"Epidemic Has Subsided At Kelly Field

Hospital Authorities Do Not Expect a Reoccurrence Here

Bronchial Pneumonia Claims Several Men

Deaths From Pneumonia Due To Tardiness In Treatment

BRONCHIAL pneumonia has been the cause of the death of ten Kelly Field men since the 13th of this month. This brings the total number of deaths from this cause. since the beginning of the influenza epidemic in September, to 40. There was one other death this week due to locomotor ataxia.

Though the influenza epidemic, which began here early this month,

for a time threatened to assume the proportions of the epidemic which was rampant throughout the Army camps of the country in September and October, it has now virtually subsided. No cases have been admitted in several days, and hospital authorities do not look for a repetition of the epidemic.

However, pneumonia has shown a decided increase. About 50 cases of pneumonia are in the Main Hospital at this field at present. Most of these cases are in good condition, a number of them being convalescent patients. It has been found that practically all of the deaths which have resulted from pneumonia at this field have followed. nia at this field have followed a very brief stay at the hospital. Hos-pital staff officers contend that death is due to the fact that physicians did not receive the cases early enough to be of material aid. The patients were too far gone when they entered the wards, they

Say.
Col. L. H. Bauer, Camp Surgeon, in commenting on this situation said: "Practically all of the deaths reported of late are quick deaths. Death occurred within 24 to 48 hours after we received the patient. In each case the patient was too far gone for us to do much toward say ing his life. Had we received the patients 48 hours sooner I am convinced that we could have saved a good number of them.

Death Rate Here Low.

The hospital authorities state that the percentage of deaths here is small compared to other camps and a good deal smaller than is usual in pneumonia. Major Robert A. Strong Chief of the Medical Service of Kelly Field, stated that it was not unusual for 50 per cent of the patients suffering from pneumonia to from that cause. At Kelly Field the percentage of death due to pneumonia has been kept down to Xmas Vacations

Contributions to Homeless French Handled Locally

THROUGH an error a few weeks back the Kelly Field Eagle printed a story urging the good cause of the Father-less Children of France in which it was stated that contributions would be received through a Chicago committee.

We wish to correct this story to the effect that San Antonio has a chapter for the collection of funds for this worthy cause and that any contemplated contributions from Kelly Field or any of the Army camps covered by The Eagle should be made through this local office.

Mrs. Luther B. Clegg, one of San Antonio's patriotic society the work in this city and The Eagle takes this opportunity of apologizing to Mrs. Clegg if her work has suffered through our erroneous

New Chevrons Must Follow Regulations

Silver "V's" on Sale in San Antonio Are Found Faulty

Official Chevrons At Post Exchange

Outline Specification for Emblem Denoting Home Service

SINCE the announcement that silver chevrons will be worn by all men of the Army, Navy and other personnel of the Military establishment to indicate service in America a variety of such insignia has appeared at the shops in the city of San Antonio. Most of these insignia are not regulation and should not be purchased by men of this command under pain of arrest, post authorities say.

There is only one kind of chevron authorized and that is the kind issued by the Quartermaster. However, since it is doubtful whether IRST Lieut. Christian H. W. Luecke, commanding officer of the 4th Aero Squadron, has been reveal of his duties on Kelly Field carry a line of authorized silver chevrons.

The authorized chevron is made of a closely woven silver braid, one-fourth inch wide. The two arms of service here has won a legion of triends and admirers.

Prior to entering the service Lieutenant Luccke was employed in Berkeley, Cal., with the Pacific Telephone & Telegraph Company and endisted in San Francisco, July 25, "Sut for Old Time's Sake," we take this opportunity of stating that such idle gossip is the same as the kind that has long been manufactured in the News factory at the corner of Navarro and College of the world's greatest aviation during his long term of service here has won a legion of friends and admirers.

Prior to entering the service Lieutenant Luccke was employed in Berkeley, Cal., with the Pacific Telephone & Telegraph Company and enlisted in San Francisco, July 25, 1917. He was sworn in at Fort McDowell and came to Kelly Field on August 12 when the initial squadrons were being formed here. He first was assigned to the 83rd Squadron and then the 112th.

He attended the Ground Officers' Training School here and while still.

The rhevrons offered for sale of a closely woven silver braid, one-fourth inch wide. The two arms of the "V" join at right angles, each arm being two and one-fourth inches long. The chevron is to be
